

## Leostream 9 It's so much more than a connection broker

In the datacenter or in the cloud. Physical or virtual. Windows, Linux, or macOS. Connect and manage, all from one place. It's that simple.

Hosting desktops just isn't what it used to be. Sure, you've got your virtual desktops - and your cloud desktops, and your hosted applications, and your high-performance hardware and your macOS workstations. You don't just need VDI connection brokering. You need comprehensive connection management for all your resources. That's where we can help.

### Complete Connection Management for Hybrid Environments

#### Any Cloud

Native support for Amazon Web Services, Azure, Google Cloud Platform, and OpenStack Cloud, with general support for any cloud platform using our Leostream Agent.

#### Hosted Desktop Infrastructure (HDI)

Manage desktops hosted in HPE Moonshot systems.

#### Workstations and Blades

Connect to workstations and blades from HP, Dell, and others. Supports high performance protocols such as Mechdyne TGX, HP RGS, and Teradici PCoIP.

#### Virtual Machines and Virtual Workstations

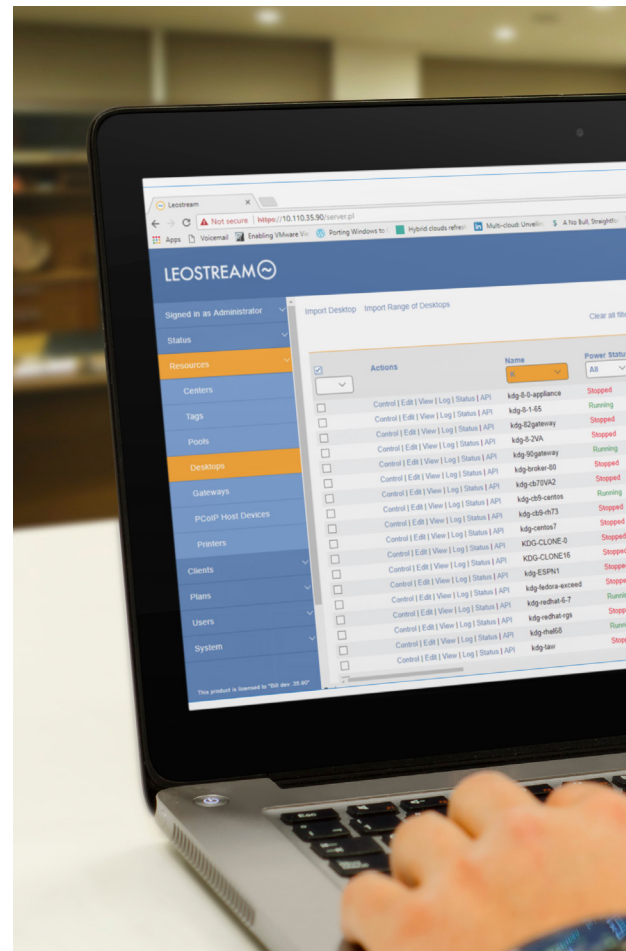

Native support for VMware virtualization, with general support for any virtualization platform, including hosts that utilize GPU passthrough technologies.

#### Multi-User Systems

Manage Microsoft RDS or multi-user Linux servers.

#### Hosted Applications

Manage Microsoft RemoteApp servers. Connect the user directly to their application, or through the Leostream Gateway for anywhere access.

## Remote Access - Any Location, Any Device

### Client-less access

Use the Leostream Gateway to launch HTML5-based RDP, VNC, or SSH connections to Windows or Linux remote desktops. Enables users to connect to their Leostream environment from any device with a web browser, including iOS and Android devices.

### Any Display Protocol

Connect to remote resources using Microsoft RDP and RemoteFX, HP RGS, Mechdyne TGX, NICE DCV, rdesktop, Teradici PCoIP (software and hardware-based), NoMachine and FreeNX, VNC, Dell Wyse TCX. The Leostream Gateway supports RDP, HP RGS, and Mechdyne TGX for high-performance, client-based remote access.

### Thin Client

Select from among the best thin clients on the market, include HP, Dell Wyse, IGEL, and more.

### BYOD

Connect from Windows, Linux, and macOS operating system.

### PCoIP Zero Client

Connect to any remote resource that supports the Teradici PCoIP protocol, including Windows, Linux, or macOS desktops with a PCoIP Remote Workstation Card, VMware virtual machines with a VMware Horizon Direct-Connection Plug-in, or desktops running the Teradici Cloud Access Software.

## Why Leostream?

### All Your Environments From A Single Interface

Manage your on-premises resources - such as vSphere virtual environments, high-performance workstations and blades, HPE Moonshot Systems, and your cloud resources in AWS, Azure, and Google Cloud Platform all from our web-based administrator UI.

### On-Demand Provisioning

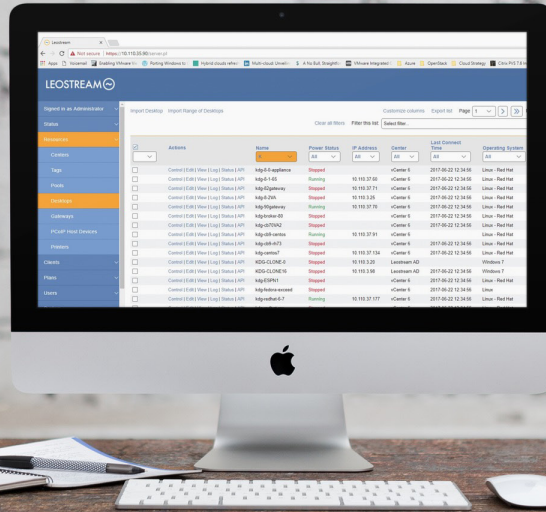

Automatically scale up and down the number of available desktops in your hybrid cloud based on user demand. Leostream can launch and delete virtual machines in VMware, OpenStack, Azure, and AWS so you can burst into the cloud when extra capacity is needed.

### Ensure Business Continuity

Advanced features such as location awareness, desktop failover, idle time monitoring, session stickiness, session management, and real-time alerts ensure your users never miss a beat.

### Built for the Enterprise

We understand the complex nature of enterprise IT environments. With support for directory services, multi-factor authentication, and reports and monitoring - Leostream fits seamlessly into your enterprise workflows.

*“If you’re not familiar with Leostream, think of their primary product this way:  
It’s a connection broker to end all connection brokers.”*

Gabe Knuth, Industry Analyst

## Customer Testimonials

“Leostream makes it easy to scale up our environment by providing policy assignment based on the user’s Active Directory group membership. In addition, Leostream’s role-based administration allows us to provide support staff with access to the Administrator tools they need.”

Matt Birkner  
EC Infrastructure Architect  
Freescale Semiconductor

“Without Leostream, it would have been too cumbersome for personnel to launch their workstations — we couldn’t expect them to remember IP addresses or hostnames. We couldn’t risk employees giving up because they failed to get past a complicated login. Using the connection broker couldn’t be easier and it really made it a no-brainer for rolling out the entire solution.”

Dick Green
